

## LIST OF APPENDICES

	<b>Page</b>
1. Code legend for the 37 continuous and nominal scale variables examined in the 129 prehistoric study sample specimens	124
2. Values for the 37 continuous and nominal scale variables recorded for the 129 study sample specimens	127
3. Frequencies and relative percentages for ordinal and nominal scale attribute variables for the 129 key-shaped formed unifaces in the study sample	144
4. Information concerning key-shaped formed unifaces provided by various Northwest researchers who responded by mail	146
5. Code legend for the 55 attribute variables examined for the 35 specimens comprising the microwear sub-sample	150
6. Frequencies and relative percentages of discrete nominal and ordinal scale microwear variables for the 35 microwear sub-sample specimens, and eight experimental tools engaged in bark and woodworking	154
7. Summary description of physical properties for lithic raw materials used to make experimental tools (E.T.'s) #1- #10	163
8. Summary description for woody plant contact materials used in the experiments	165
9. Summary description of experimental tool use results	167
