

## LIST OF TABLES

---

Table .....	Page
1 Temporal Periods and Associated Excavation Units .....	4-5
2 Temporal Periods, Field Strata-Designations, and 14C Date Range .....	6
3 Screening Methods Used for Each Excavation Unit and Temporal Period .....	6
4 Frequencies of Identified Fauna from Units of the Rivermouth Trench.....	7
5 Frequencies and Period Percentages of Selected Fauna within Dry- and Wet-Screened Units of the Rivermouth Trench.....	8
6 Wet- and Dry-Screened Matrix Volume by Period .....	8
7 Total Abundance of Recovered Mammal Bone by Period .....	12
8 Total Abundance of Recovered Bird Bone by Period .....	16
9 Total Abundance of Recovered Fish Bone by Period .....	18
10 Frequency of Recovered Deer Elements.....	24
11 Comparison of the Percentage Survival of Goat Elements (after Brain 1980:117) and the Recovery of Deer Elements .....	25
12 Comparison of the Percentage Survival of Goat Elements and the Recovery of Deer Elements by Excavation Unit and Period .....	26
13 Spearman's Rank Order Correlation Coefficient for the Relationship Between the Recovered Frequencies of Deer Elements and the Percentage Survival of Goat Elements .....	27
14 Distribution of Selected Fauna Abundance in the Rivermouth and Central Main Trenches .....	28
15 Seal Element Distribution .....	30
16 Fauna Abundance Standardized by Period .....	33
17 Median Estimated Fish Weight and Age Profile of Salmon for 10 cm. Excavation Levels of Unit 68-70S,4-6W .....	52
18 Neonatal Harbour Seal ( <i>Phoca vitulina</i> ) Elements by Temporal Period .....	59
A-1 to A-6 Mammal Frequencies.....	71-74
A-7 to A-10 Bird Frequencies .....	75-77
A-11 to A-16 Fish Frequencies.....	78-83
B-1 Radiocarbon Dates from Namu .....	92
B-2 Radiocarbon Dates by Unit and Period.....	94
C-1 to C-4 Frequencies of Identified Fauna in Matrix Samples.....	98-100
